

INVESTOR TIER 2 · PLANNING & REGULATORY

Planning Approval & Regulatory Status

This document provides an honest, current account of SHER Sanctuary's planning and regulatory position as at 11 July 2026. Statutory planning approval has not yet been granted. Investors are advised to verify the current status with independent legal counsel before making any commitment.

Important: References in SHER marketing materials to "approved" designs, drawings, or plans refer to owner-approved design documents — not statutory planning approval from the Development Control Authority (DCA) or any other regulatory body. This document uses the term "approved" to refer to regulatory/statutory approval only.

1. Development Control Authority (DCA) — Planning Status

Item	Status as at 11 July 2026
DCA formal planning application submitted	<i>Not yet submitted</i>
DCA planning approval granted	<i>Not yet granted</i>
Pre-application engagement with DCA	<i>In progress — design basis established</i>
Design basis ready for planning submission	Yes — all four product types at Gate 4+
Target DCA submission	<i>Q3 2026 (subject to application preparation)</i>

The SHER project is governed by the Physical Planning and Development Act Cap. 5:12 of Saint Lucia. A formal planning application to the DCA is a pre-condition for any construction on the estate. Until DCA approval is granted, no residential construction may lawfully commence.

2. Regulatory Authorities — Approval Requirements

In addition to DCA planning permission, the SHER development may require approvals, consultations, or notifications from the following authorities:

Authority	Relevance	Status
Development Control Authority (DCA)	Primary planning approval for all construction	<i>Application not yet submitted</i>
Saint Lucia National Trust (SLNT)	Consultation required for development adjacent to RAMSAR-designated Savannes Bay wetland; any use of Lot 7 (Crown/SLNT-managed peninsula)	<i>Engagement ongoing</i>
Fisheries Department	Coastal development impact assessment; marine reserve proximity (Scorpion Islet Marine Reserve)	<i>Not yet formally engaged at DCA stage</i>
Forestry Department	Vegetation clearance and conservation zone management within SHER's conservation covenant	<i>Not yet formally engaged at DCA stage</i>

Authority	Relevance	Status
Department of Sustainable Development	Environmental Impact Assessment (EIA) may be required depending on scale and DCA determination	<i>EIA requirement to be confirmed at DCA pre-application stage</i>
Water and Sewerage Company (WASCO)	Water supply connection and wastewater approvals	<i>Engagement to follow DCA submission</i>
LUCELEC / Utilities	Electrical grid connection or off-grid solar registration	<i>To be confirmed in detailed design</i>
Inland Revenue Department	Stamp duty, vendor's tax, and associated property transaction requirements	Standard requirements apply; no special dispensations sought

3. Land Acquisition Status

Parcel	Role	Acquisition Status
Lot 890 (Block 1621B)	Gateway, reception, hospitality, infrastructure	Purchased — title registration in progress
Lot 897 (upper slope)	Primary accommodation zone — cottages and villas	Subject to acquisition agreement
Lot 905 (mid-slope)	Transition zone — eco-tourism and lower accommodation	Subject to acquisition agreement
Lots 12 & 13 (lower coastal)	Mangrove buffer, kayak launch, conservation trail	Subject to acquisition agreement
Lot 7 (Lot F / Crown / SLNT)	Peninsula — eco-tourism by SLNT agreement; not owned by SHER	Use-rights by SLNT agreement — not a SHER acquisition
Lot E (condominium parcel)	Condo Type A — 8 boutique units	Development parcel — subject to planning confirmation

4. Conservation Context

The SHER estate is adjacent to the Savannes Bay Wetlands, a RAMSAR-designated internationally important wetland. The estate encompasses approximately 2.19 acres (95,374 sq ft / 46.7% of total estate) designated as conservation land, subject to SHER's conservation covenant and RAMSAR obligations. The development design has been developed with the conservation boundary as a primary constraint. SHER's conservation commitment is a design and marketing differentiator — it is not, at this stage, a separately certified or independently audited status. See SHER-INV-003-R01 for the full Environmental & Conservation Position Summary.

5. Design Approvals — Owner-Approved vs. Statutory

Clarity of terms: All four SHER product types (Cottage Type A, Villa Type A, Condo Type A, Flagship Villa) have been taken through Gate 1–4 design approval processes. "Gate" approvals refer to the owner's internal design approval process — they are not statutory or professional approvals. The purpose of completing internal gates before DCA submission is to ensure the planning application is based on a fully resolved, owner-approved design basis.

Product Type	Design Gate Status	DCA Status
Cottage Type A (6 units)	Gates 1–4 complete, visual record accepted	<i>Pending DCA submission</i>
Villa Type A (5 units)	Gates 1–4 complete, visual record accepted	<i>Pending DCA submission</i>
Condo Type A (8 units)	Gates 1–4 complete	<i>Pending DCA submission; visual record pending</i>
Flagship Villa Type B (1 unit)	Concept agreed — individual brief at Tier 3	<i>Pending DCA submission</i>
Lot 890 / Gateway / Café Pavilion	Owner coordination package complete	<i>Pending DCA submission</i>

Investor note: The completion of all four product design gates before DCA submission represents a significant project milestone. It means the planning application will be based on a fully resolved, owner-approved design basis across all residential product types. This reduces the risk of material design changes being required post-planning — a common source of delay and cost overrun in comparable projects.
