

Approved Design Basis Summary

INVESTOR TIER 2 · DESIGN BASIS & PRODUCT STANDARD

Approved Design Basis Summary

A summary of the approved design basis for each SHER residential product type, drawn from the owner-approved Gate 1–4 documents. This document demonstrates that all four product types have completed a rigorous internal design approval process and are ready for professional consultant engagement and DCA planning submission.

Not for construction: All documents referenced and summarised here are design-intent documents approved by the owner. They are not construction drawings, structural calculations, MEP specifications, or regulatory approvals. Professional technical documentation will be produced by appointed consultants during the DCA submission and construction phase.

1. Design Gate Process — Overview

Every SHER residential product type has been taken through a five-gate owner design approval process before DCA planning submission. The gates ensure that the planning application is based on a fully resolved, owner-approved design basis — reducing the risk of material changes post-planning:

Gate	Content	Output
Gate 1 — Product Brief	Concept, spatial programme, experience intent, conservation controls, size range, materials philosophy	Architectural Product Brief PDF (owner-approved)
Gate 2 — Schematic Planning	Floor plan layouts, spatial relationships, indoor-outdoor connections, orientation, privacy strategy	Schematic Plan PDF (owner-approved)
Gate 3 — Elevations & Sections	External appearance, roof form, wall heights, fenestration, veranda and deck expression, section through key spaces	Elevations & Sections PDF (owner-approved)
Gate 4 — Build-Up, MEP & Materials	Wall, roof, and floor build-up; MEP concealment and routing strategy; material palette; rendering and visual controls; energy and services intent	Gate 4 Build-Up PDF (owner-approved)
Gate 5 — Visual Acceptance	3D render review; visual acceptance record; website/gallery approval; caption and disclaimer controls	Visual Acceptance Record + Gallery Pack (owner-accepted)

2. Cottage Type A — Gate Summary

Hillside Cottage (Type A) · C-01–C-06 · 6 For-Sale Units

GATES 1–5 COMPLETE

Gate	Document	Status	Key Outcomes
Gate 1	SHER-CTA-001 · Architectural Product Brief R01	Owner Approved — 6 Jul 2026	One-bedroom sanctuary; 900–1,100 sf total experience area; butterfly roof; marine steel + timber; stone + lime render; conservation controls defined

Gate	Document	Status	Key Outcomes
Gate 2	SHER-CTA-002 · Schematic Plan Expanded A R02	Owner Approved — 6 Jul 2026	Expanded layout with service zone; indoor-outdoor connection confirmed; veranda, outdoor shower court, screened living zone; privacy strategy per plot
Gate 3	SHER-CTA-003 · Elevations & Sections Expanded A R02	Owner Approved — 6 Jul 2026	Butterfly roof expression confirmed; wall-to-veranda relationship; screen and glazing system; timber ceiling volume; section through bathing zone
Gate 4	SHER-CTA-004 · Build-Up MEP Materials R02	Owner Approved — 6 Jul 2026	Marine steel structural strategy; MEP routing and concealment; material palette locked; rendering controls; lighting philosophy; no synthetic cladding
Gate 5	SHER-CTA-005 · Visual Acceptance Record R02	Accepted for Website / Gallery — 6 Jul 2026	Full render set reviewed and accepted; captions and disclaimers approved; website gallery pack issued

3. Villa Type A — Gate Summary

Villa Type A · V-01–V-05 · 5 For-Sale Units			GATES 1–5 COMPLETE
Gate	Document	Status	Key Outcomes
Gate 1	SHER-VTA-001 · Architectural Product Brief R01	Owner Approved — 7 Jul 2026	Two/three-bedroom luxury villa; 2,750–3,650 sf; private pool; deep pavilion veranda; full indoor-outdoor living; premium materials
Gate 2	SHER-VTA-002 · Schematic Planning Corrected R01	Owner Approved / Corrected — 7 Jul 2026	Two plan expressions confirmed: Linear View (panoramic outlook) and Courtyard / Split-Wing (layered privacy); both on hurricane-resilient frame
Gate 3	SHER-VTA-003 · Elevations & Sections R01	Owner Approved — 8 Jul 2026	External expression for both villa configurations; roof form, wall heights, fenestration, pool terrace relationship confirmed
Gate 4	SHER-VTA-004 · Build-Up MEP Materials R01	Owner Approved — 8 Jul 2026	Structural strategy per plot; MEP concealment; material palette; pool drainage and landscape integration controls; no synthetic cladding
Gate 5	SHER-VTA-005 · Visual Acceptance Record R01	Accepted for Website / Gallery — 8 Jul 2026	Full villa render set accepted; captions and disclaimers approved; website gallery pack issued

4. Condo Type A — Gate Summary

Condo Type A · 8 Units · Lot E			GATES 1–4 COMPLETE · GATE 5 PENDING
Gate	Document	Status	Key Outcomes
Gate 1	SHER-CNA-001 · Architectural Product Brief R01	Owner Approved — 8 Jul 2026	Boutique 8-unit eco-luxury condo; 1,020–1,300 sf per unit; steel I-beam primary frame; open-plan living; private balconies; stepped courtyard preferred form

Gate	Document	Status	Key Outcomes
Gate 2	SHER-CNA-002 · Schematic Planning R01	Owner Approved — 8 Jul 2026	Preferred configuration: Stepped Courtyard. Fallback: Split Pair. Both on I-beam frame strategy. Courtyard provides shared green heart without common corridor.
Gate 3	SHER-CNA-003 · Elevations & Sections R01	Owner Approved — 8 Jul 2026	External expression for both preferred and fallback; balcony and screen language; roof form; stepped massing for privacy and view separation
Gate 4	SHER-CNA-004 · Build-Up MEP Materials R01	Owner Approved — 8 Jul 2026	Concealed I-beam structural strategy confirmed; MEP routing within structural bays; material palette consistent with cottage/villa; natural stone and timber cladding over steel frame
Gate 5	Visual Acceptance Record	Pending — working studies under revision	3D renders in revision (pool proportion, mangrove setback corrections required). Visual acceptance record to be issued on completion of corrections.

The Condo Type A visual acceptance record will be issued once working render studies are corrected and accepted. The structural and design basis is fully resolved at Gate 4 level. The absence of Gate 5 acceptance does not affect the design or planning basis.

5. Flagship Villa Type B — Design Status

Flagship Villa (Type B) · V-06 · 1 Unit · Southernmost Position

INDIVIDUAL BRIEF · TIER 3

The Flagship Villa is a single bespoke residence at the estate's southernmost position, designed individually for the buyer/investor. The same six design pillars and charter controls apply. The full individual design brief for V-06 is part of the Tier 3 package (NDA required). Structural strategy will be confirmed by the appointed engineer following individual brief sign-off.

6. Governing Design Document — SHER Charter R02

All four product types are governed by the SHER Sanctuary Design & Experience Charter R02 (SHER-DNA-001-R02, Owner Approved 6 July 2026). The Charter is the supreme design constitution — it controls design intent, visual truthfulness, conservation discipline, material authenticity, and approval gate standards. No design element may be implemented that conflicts with the Charter without a formal owner-approved variation.

The Charter is available in full at Tier 2 as a controlled PDF (GOV-001). A Tier 2 investor summary is included in the investor portal content. The full editable source is internal only.

Investor confidence note: The completion of Gates 1–5 across Cottage Type A and Villa Type A, and Gates 1–4 across Condo Type A, before DCA planning submission represents a level of pre-application design resolution that is uncommon in comparable Caribbean development projects. It reduces planning risk, limits post-approval design changes, and gives professional consultants a clear, owner-approved design basis from day one of engagement.
