ECO SANCTUARY

TOUR MANAGEMENT SYSTEM

Architecture Specification

Built on Google Workspace

Savannes Bay, Micoud • Saint Lucia

May 2026 · Version 1

1. System Overview

The SHER Tour Management System (TMS) is a fully integrated operations and intelligence platform built within Google Workspace. It connects the guest-facing website at safehavenecotours.com to a live internal management system that captures every enquiry, manages every booking slot, tracks every guest relationship, automates routine communications, and produces dashboard intelligence for every operational and strategic decision the business needs to make.

The system is designed to be owned and operated by Kemble and Sabina without technical dependency on a developer for day-to-day use. It requires no coding to maintain, uses tools the team already has access to, and produces dashboards that are ready for management review, partner presentations, investor reporting, and regulatory documentation at any time.

DESIGN PRINCIPLE The TMS must be as low-friction to use as it is comprehensive. Every form is simple. Every automation is invisible. Every dashboard answers a specific question. The system should feel like it is running quietly in the background — not like a job in itself.

1.1 Four-Layer Architecture

The TMS operates across four layers that flow into one another:

Layer	Component	Function
Layer 1	Guest & Partner Touchpoints	Website forms, WhatsApp, email, resort concierge portal
Layer 2	Google Workspace Core	Data intake forms, master database sheets, automation engine
Layer 3	Intelligence Layer	Six Looker Studio dashboards for management and reporting
Layer 4	Season & Market Calendar	Annual operational framework covering peak, mystic, and local seasons

2. Google Workspace File Structure

All TMS files live within a single organised Google Drive folder structure. This ensures everything is findable, backed up automatically, and accessible on any device. The folder structure also doubles as the document register for the business.

Folder	Contents
SHER TMS / MASTER DATABASE	All 11 master Google Sheets. This is the operational brain.
SHER TMS / FORMS	All 6 Google Forms (linked to master database sheets).
SHER TMS / DASHBOARDS	Looker Studio dashboard files. Linked live to master database.
SHER TMS / COMMUNICATIONS	Email templates, WhatsApp message templates, confirmation scripts.
SHER TMS / DOCUMENTS	Guest waivers (signed PDFs), contracts, partner agreements, regulatory filings.
SHER TMS / REPORTS	Auto-generated weekly and monthly reports. Each report auto-named with date.
SHER TMS / CONSERVATION	PSEPA contribution records, National Trust correspondence, stewardship fund log.

3. The Master Database — 11 Sheets

The master database is a single Google Sheets workbook with eleven tabs. Each tab is a structured table. Google Forms write directly into the relevant tabs. Apps Script automations read and write across tabs. Looker Studio reads from the workbook for dashboards. Nothing lives outside this workbook unless it is a document (PDF, image) stored in Drive and referenced by a link inside the workbook.

Sheet 1 — MASTER BOOKINGS (live operational sheet)

Field / Element	Specification
Booking ID	Auto-generated: SHER-YYYY-NNNN (e.g. SHER-2026-0047)
Booking status	Enquiry / Qualified / Confirmed / Completed / Cancelled / Deferred
Experience name	Dropdown: all 11 experiences from Experience Catalogue
Guest name(s)	Lead guest full name + companion name if applicable
Guest contact	Phone (WhatsApp preferred) + email
Booking date	Date of the experience (not date of booking)
Preferred time	5:15 AM / 9:00 AM / By appointment
Group size	Number
Occasion type	None / Proposal / Anniversary / Vow Renewal / Birthday / Other
Revenue (USD)	Auto-calculated from Experience Catalogue × group size
Payment status	Unpaid / Deposit received / Paid in full
Payment processor	FYGARO payment link sent (Y/N) + confirmation ref
Partner referral	Name of resort/concierge if referred (links to Partner Register)
Waiver status	Not sent / Sent / Signed
Weather condition	Golden Mirror / Mystic Morning / Calm / Rain / Modified / Cancelled
Guide assigned	Name from Staff Schedule
Conservation contribution	EC amount directed to PSEPA fund (auto if Mystic Morning)
Gift issued	Mystic Morning Bundle Y/N / Celebration keepsake Y/N
Post-tour feedback	Submitted Y/N + rating (1–5) + link to feedback record
Notes	Free text for any special instructions or guest requests

Sheet 2 — ENQUIRY LOG

Field / Element	Specification
Enquiry ID	Auto-generated on form submission
Date received	Auto-timestamp
Guest name	From enquiry form
Contact details	Phone + email
Experience interest	Which experience they asked about
Preferred dates	Up to 3 preferred dates entered by guest
Flexibility flag	Flexible (any date) / Somewhat / Fixed date only
Group size	Number
Occasion	None / Proposal / Anniversary / etc.
How they heard	Resort name / Google / Social / Direct / Walk-in / Other
Enquiry status	New / Responded / Converted to booking / No response / Lost
Response sent	Date and method (email / WhatsApp)
Conversion date	Date enquiry became a booking (links to Booking ID)
Notes	Any context from the conversation

Sheet 3 — GUEST DATABASE

Field / Element	Specification
Guest ID	Auto-generated on first booking
Full name	
Email	
WhatsApp / phone	
Nationality / origin	Country or region
First visit date	Date of first SHER experience
Total visits	Auto-count from Bookings sheet
Total spend (USD)	Auto-sum from Bookings sheet
Experiences taken	List linked to Bookings
Milestones celebrated	Proposal / Anniversary / etc. noted here
Referrals made	Number of times they referred a friend (tracked via How They Heard)
Active credit	USD credit balance from Mystic Morning Bundle or other gestures

Field / Element	Specification
Marketing consent	Y/N — agreed to receive SHER communications
Notes	Preferences, dietary needs, special requests for future visits

Sheet 4 — AVAILABILITY CALENDAR (live)

One row per operating day of the year. This sheet is the source of truth for what is available to book. The booking form checks this sheet before confirming a slot.

Field / Element	Specification
Date	Every calendar day Jan–Dec
Day of week	Auto-calculated
Season tag	Peak / Shoulder / Mystic / Local (auto from Season Rules tab)
Bay Serenity slot (5:15 AM)	Available / Booked / Blocked / Weather hold
Bay Serenity guests booked	Number (max 6)
Calm Reflections slot (9:00 AM)	Available / Booked / Blocked / Weather hold
Calm Reflections guests booked	Number (max 6)
Scorpion Islet slot	Available / Booked / Blocked
Islet booking type	Which package is occupying the slot
Table d'Eau slot (2026+)	Available / Booked / Blocked
Guide available	Names assigned for the day
Weather forecast note	Free text from daily morning log
Day notes	Public holidays, local events, resort closures, special conditions

Sheet 5 — EXPERIENCE CATALOGUE

Field / Element	Specification
Experience name	All 11 experiences + Table d'Eau
Category	Bay Serenity / Islet Private / Islet Celebration / Dining
Public price (USD)	Per person or per couple/flat as applicable
Partner price (USD)	Discounted rate for resort concierge bookings
Max capacity	Maximum guests per session
Minimum to operate	Minimum guests required (e.g. 2 for Golden Mirror)
Duration	Hours

Field / Element	Specification
Departure time	Fixed or by appointment
Islet landing required	Y/N (counts against the one-per-day limit)
Celebration kit required	Y/N (triggers setup checklist)
Refreshment profile	Golden: fruit/juice · Mystic: cocoa tea/bakes · Celebration: champagne/etc.
Variable cost per booking	Average input cost for budgeting (flowers, champagne, keepsakes etc.)
Active (Y/N)	Whether the experience is currently on sale

Sheet 6 — PARTNER REGISTER

Field / Element	Specification
Partner ID	Auto-generated
Partner name	Resort, hotel, or individual concierge name
Type	Luxury resort / Boutique hotel / Villa manager / Wellness retreat / Driver
Contact name	Primary contact at the property
Contact details	Email + WhatsApp
Commission rate	Percentage or fixed amount per guest/booking
Commission method	Added to guest invoice deduction / Direct payment
Date onboarded	
Familiarisation tour taken	Y/N + date
Total bookings referred	Auto-count from Bookings sheet
Total commission paid (USD)	Auto-sum
Last referral date	Auto from Bookings sheet
Partner status	Active / Inactive / Paused
Notes	Any relationship notes or preferences

Sheet 7 — REVENUE TRACKER

Field / Element	Specification
Date	Transaction date
Booking ID	Links to Master Bookings
Experience	

Field / Element	Specification
Gross revenue (USD)	Full public price
Partner commission deducted	If applicable
Net revenue (USD)	Auto-calculated
Variable cost	From Experience Catalogue
Contribution margin	Auto-calculated: net revenue – variable cost
Payment received via	FYGARO / Bank transfer / Cash
Month	Auto-extracted for monthly rollups
Season	Auto-tagged from Availability Calendar
Monthly target	Pulled from Targets tab
vs. target	Auto-calculated variance

Sheet 8 — WEATHER LOG

Filled daily by the guide using the Daily Morning Log form. Becomes the operational record for the Mystic Morning/Golden Mirror ratio and for the PSEPA stewardship reporting.

Field / Element	Specification
Date	Auto-timestamp
Departure time	5:15 AM or 9:00 AM
Sky condition	Clear / Partly cloudy / Overcast / Drizzle / Rain / Threatening
Experience delivered	Golden Mirror / Mystic Morning / Calm Reflections / Modified / Cancelled
Reason for modification	If applicable
Mystic Morning Bundle issued	Y/N + number of guests
Conservation contribution triggered	Y/N + EC amount
Water condition	Calm / Light chop / Moderate / Rough
Wildlife notable	Any significant observation (turtles, rare birds, unusual activity)
Guide notes	Free text — used for storytelling development and monthly review

Sheet 9 — CONSERVATION FUND TRACKER

Field / Element	Specification
Date	

Field / Element	Specification
Booking ID	Source booking
Contribution type	Mystic Morning transition / Voluntary add-on / Corporate donation
Amount (EC\$)	
Guest name(s)	For personalised receipt card
Certificate / card issued	Y/N
Cumulative total (EC\$)	Running sum
Transfer to National Trust	Date of each disbursement to PSEPA Stewardship Fund
Acknowledgement received	Y/N + reference

Sheet 10 — STAFF & GUIDE SCHEDULE

Field / Element	Specification
Date	
Guide name	
Role	Lead Guide / Supporting Guide / Celebration Coordinator
Experience(s) assigned	
Departure time	
Briefing notes	Occasion type, guest preferences, setup required
Completed Y/N	
Hours worked	
Notes	Incident, feedback, observations

Sheet 11 — EQUIPMENT LOG

Field / Element	Specification
Equipment ID	Kayak-01 through Kayak-14, Canoe-01, etc.
Type	Tandem kayak / Single kayak / Guide kayak / Traditional canoe / PFD / Paddle
Condition	Excellent / Good / Needs attention / Out of service
Last inspection date	
Next inspection due	Auto-calculated: 30 days from last
Maintenance notes	
Retired date	If applicable

4. Data Intake — Six Google Forms

All six forms are built in Google Forms and linked to the master database. Forms 1–3 are guest-facing and embedded on or linked from the website. Forms 4–6 are internal staff-use only.

Form 1 — Guest Enquiry Form (website-linked)

The primary entry point from the website. Embedded or prominently linked on the booking pages. Short enough to complete in under 3 minutes.

Field / Element	Specification
Full name	Required
Email address	Required
WhatsApp / phone number	Required
Experience interested in	Dropdown: all active experiences
Preferred date 1	Date picker
Preferred date 2	Date picker (optional)
Preferred date 3	Date picker (optional)
Date flexibility	I need these specific dates / I am somewhat flexible / Any date works
Number of guests	1 / 2 / 3 / 4+ (dropdown)
Is this for a special occasion?	None / Proposal / Anniversary / Vow Renewal / Birthday / Other
How did you hear about us?	Resort concierge / Google / Social media / Friend / Other
Anything else to tell us?	Open text (optional) — phrased as invitation not form field

RESPONSE STANDARD Every enquiry receives an acknowledgement within 4 hours and a full response within 24 hours. The auto-reply (see Automation Engine) goes immediately. The personal response follows from Kemble or Sabina.

Form 2 — Guest Date Flexibility Form (website-linked)

For guests who want to be on a waitlist or who cannot find a suitable date. Linked from the booking pages with the label "Can't find the right date? Tell us your window."

Field / Element	Specification
Full name	Required
Contact details	Email + WhatsApp

Field / Element	Specification
Experience interested in	Dropdown
Available from	Date
Available until	Date
Days of week preferred	Multi-select: Mon–Sun
Preferred time	Dawn (5:15 AM) / Mid-morning (9 AM) / Either / Flexible
Occasion	If relevant
Flexibility level	Contact me when anything opens / Early morning only / Specific window
Notes	Open text

Form 3 — Pre-Tour Waiver & Health Declaration (sent after booking)

Sent to confirmed guests 72 hours before their experience. Must be completed before arrival. Signed digitally via Google Forms. Stored in Drive.

Field / Element	Specification
Guest full name	
Experience booked	Pre-filled from booking data where possible
Date of experience	
Swimming ability	Confident swimmer / Can swim / Non-swimmer (must declare)
Weight range	For kayak stability: under 80kg / 80–100kg / over 100kg
Medical conditions relevant to water activity	Yes (describe) / No
Pregnancy	Yes (note: must advise guide) / No
Emergency contact name	
Emergency contact phone	
Liability acknowledgement	Checkbox: I understand the activity involves inherent risk...
Conservation Code agreement	Checkbox: I have read and agree to the SHER Conservation Code
Photography consent	Checkbox: I consent to photographs being taken during the experience

Form 4 — Booking Confirmation (internal staff use)

Completed by Kemble or Sabina when converting a qualified enquiry into a confirmed booking. Updates the Master Bookings sheet and triggers the confirmation automation.

Field / Element	Specification
Link to Enquiry ID	Dropdown from Enquiry Log
Confirmed experience	
Confirmed date	
Confirmed group size	
Revenue amount confirmed	
FYGARO payment link sent	Y/N
Partner referral credited	Partner name or None
Special requirements noted	Celebration setup / accessibility / dietary / other
Guide assigned	From Staff Schedule
Confirmation email sent	Y/N (triggers auto if not already sent)

Form 5 — Post-Tour Feedback (sent after experience)

Sent automatically 3 hours after the experience concludes. Short, warm, and optional — but completion is tracked for follow-up.

Field / Element	Specification
Overall experience rating	1–5 stars
Which experience did you take?	Pre-filled
What was the most memorable moment?	Open text
Was the guide excellent?	Yes / Good / Could improve
Weather delivered	Golden Mirror / Mystic Morning / Calm Reflections / Other
If Mystic Morning: how did you feel about it?	Loved it / It was fine / Preferred a golden morning
Would you return?	Definitely / Probably / Not sure / Unlikely
Would you recommend SHER?	Yes — already have / Yes / Maybe / No
Any suggestions?	Open text (optional)
May we share your feedback?	Yes / Yes anonymously / No

Form 6 — Daily Morning Log (guide completes each operating day)

Filled by the lead guide before or immediately after the experience. Takes less than 2 minutes. Feeds the Weather Log, triggers conservation contributions if Mystic Morning, and populates the daily entry on the Availability Calendar.

Field / Element	Specification
Date	Auto-timestamp
Experience(s) delivered today	Multi-select from experience list
Sky condition at departure	Clear / Partly cloudy / Overcast / Drizzle / Rain / Threatening
Experience mode	Golden Mirror / Mystic Morning / Calm Reflections / Modified / Cancelled
Number of guests	
Mystic Morning Bundle issued	Y/N — triggers conservation contribution automation
Wildlife or bay observation	Open text — any notable sighting
Equipment condition check	All good / One item needs attention (specify) / Safety concern (specify)
Guest mood at end	Delighted / Happy / Neutral / Disappointed — triggers follow-up if disappointed
Guide notes	Free text — used for monthly review and storytelling development

5. Automation Engine — Google Apps Script

Eight automated workflows run silently in the background using Google Apps Script. None require manual triggering. Each is built once, tested, and then runs without maintenance unless pricing or messaging changes. All automations send through Gmail and log their actions in the relevant master sheets.

Automation 1 — Enquiry Auto-Reply

Trigger: Guest submits Form 1 (Guest Enquiry). Fires within 60 seconds of submission.

Field / Element	Specification
What it does	Sends an immediate personalised acknowledgement email to the guest's email address.
Tone	Warm, unhurried. No robotic confirmation language. Uses the guest's name.
Content	Confirms receipt. Tells them they will hear back within 24 hours. Includes one paragraph of the SHER weather philosophy (the booking confirmation passage from the Experience Framework). Links to the website.
Also does	Adds the enquiry to the Enquiry Log sheet with status "New". Sends a WhatsApp-formatted notification to Kemble's number summarising the enquiry details.

Automation 2 — Booking Confirmation Package

Trigger: Staff completes Form 4 (internal booking confirmation). Fires immediately.

Field / Element	Specification
What it does	Sends the full booking confirmation to the guest.
Content	Booking details. Experience description. What to bring. What to expect. The SHER weather philosophy paragraph. Link to the Waiver form (Form 3). Payment link (FYGARO) if not yet paid. Conservation mission note.
Season check	If the booking date falls in June–October, the email includes the Mystic Morning season language: "You are booking during the Caribbean's most dramatic season..."
Also does	Updates Master Bookings status to Confirmed. Creates a calendar event in the SHER Google Calendar with guest name, experience, and guide assigned.

Automation 3 — Mystic Morning Trigger

Trigger: Guide submits Form 6 (Daily Morning Log) with experience mode = Mystic Morning.

Field / Element	Specification
What it does	Immediately triggers three actions.
Action 1	Creates a Conservation Fund entry in Sheet 9: EC \$25 per guest, guest name(s) noted, certificate flag set to Y.
Action 2	Generates a future credit record in Guest Database for each guest: USD \$30, valid 12 months.
Action 3	Queues a post-experience email (sent 3 hours after the declared tour end time) that includes the Mystic Morning message, the conservation contribution acknowledgement, and the future credit details.

Automation 4 — 48-Hour Guest Reminder

Trigger: Time-based. Runs nightly. Checks for bookings with a date 48 hours away.

Field / Element	Specification
What it does	Sends a personalised reminder email to confirmed guests 48 hours before their experience.
Content	Confirms the date, time, and experience. What to bring (light layer for dawn, water, camera). Parking/meeting point directions. Guide's name. Reminds them of the Conservation Code. Closes with the morning philosophy: "Whatever the bay offers tomorrow morning, we will be there with you."
Season check	If the date is in June–October or weather forecast (from the Day Notes in Availability Calendar) suggests cloud, adds a gentle Mystic Morning preparation line: "The forecast suggests we may wake to a Mystic Morning. We will have something warm for you."

Automation 5 — Daily Morning Brief (Guide)

Trigger: Time-based. Runs at 4:30 AM on every day with a confirmed Bay Serenity booking.

Field / Element	Specification
What it does	Sends the lead guide a brief operational summary for that morning.
Content	Guest names. Experience type. Number of guests. Any special requirements (celebration, occasion, accessibility). Waiver status. Equipment flag if anything was noted. Refreshment profile (Golden or Mystic preparation).

Field / Element	Specification
Also sends	A WhatsApp-formatted version of the same brief to the guide's phone number.

Automation 6 — Post-Tour Feedback Request

Trigger: Time-based. Runs twice daily (11 AM and 6 PM). Checks for experiences completed 3 hours prior.

Field / Element	Specification
What it does	Sends Form 5 (Post-Tour Feedback) link to every guest who completed an experience that day.
Tone	Warm and brief. Not a corporate survey request. A genuine invitation: “If the morning is still with you, we would love to hear.”
Tracking	Updates Guest Database feedback status. If rating is 4–5 stars, adds to a “Review candidates” column for personal follow-up to request a Google/TripAdvisor review.

Automation 7 — Weekly Revenue & Operations Report

Trigger: Time-based. Every Monday at 7:00 AM.

Field / Element	Specification
What it does	Auto-generates a formatted weekly summary and emails it to Kemble and Sabina.
Content	Total revenue for the week. Breakdown by experience. Number of guests by experience. Enquiries received. Enquiries converted. Partner referrals. Weather log summary (Golden Mirror vs Mystic Morning ratio). Conservation fund contribution total. Any equipment flags from the week.
Also does	Appends the week's totals to the Revenue Tracker monthly summary row.

Automation 8 — Availability Conflict Check

Trigger: Runs when Form 4 (Booking Confirmation) is submitted. Checks the Availability Calendar before writing the confirmed booking.

Field / Element	Specification
What it does	Before confirming a booking, checks that the requested slot is not already full or blocked.

Field / Element	Specification
Bay Serenity slots	Checks that guest count + existing bookings for that date does not exceed 6.
Islet slot	Checks that no other islet booking exists for that date (one-per-day limit).
If conflict found	Does not write the booking. Instead sends an alert to Kemble/Sabina: "Conflict detected on [date] for [experience]. Guest: [name]. Please resolve manually."
No conflict	Writes the booking, updates the Availability Calendar, and proceeds to fire Automation 2.

6. Intelligence Layer — Six Looker Studio Dashboards

All six dashboards are built in Google Looker Studio (free) and connected live to the master Google Sheets workbook. They refresh automatically whenever the underlying data changes. Each dashboard is designed to answer one specific management question. They can be shared as view-only links with partners, investors, or regulators without giving access to the underlying data.

Dashboard 1 — Command Centre

Field / Element	Specification
Purpose	The daily operational view. What is happening today and this week.
Today panel	Today's bookings (experience, guests, guide). Slot availability status (colour: green=open, amber=partial, red=full). Weather condition flag. Any guest notes.
This week panel	All confirmed bookings for the 7-day window. Revenue committed this week. Enquiries open/pending response.
KPI strip	Cash received this month. Cash in pipeline. Guests hosted this month. Conversion rate (enquiries to bookings). Mystic Morning ratio (% of dawn sessions that transitioned).
Alerts	Waivers not returned. Equipment flags. Guests with active credits not yet used.

Dashboard 2 — Booking Pipeline

Field / Element	Specification
Purpose	Track every enquiry from first contact to completed experience and review.
Funnel view	Enquiries received → responded → qualified → confirmed → completed → feedback submitted.
Conversion rates	% at each stage. Identifies where guests are dropping out.
Source breakdown	Which channel is generating enquiries: website / concierge / social / word of mouth.
Response time	Average time from enquiry to personal response. Target: under 4 hours.
Partner view	Breakdown by referring partner. Who is sending the most bookings.

Dashboard 3 — Annual Season Planner

Field / Element	Specification
Purpose	The strategic revenue view. How is the year filling up? Are targets on track?
12-month calendar	Each month colour-coded by season (Peak/Shoulder/Mystic/Local). Booking density shown as heat (dark = many bookings, light = availability).
Revenue by month	Bar chart: actual vs target. Running total vs annual target.
Experience mix	Which experiences are driving revenue each month. Identifies celebration package seasonality.
Capacity utilisation	What percentage of available slots are filled each week.
Forecast	Simple linear projection to year-end based on current booking pace.

Dashboard 4 — Guest Intelligence

Field / Element	Specification
Purpose	Who are SHER's guests and how do they behave?
Source market map	Nationalities breakdown. Top origin countries.
Repeat guest rate	What percentage of guests have returned? Trend over time.
Lifetime value	Average total spend per guest.
Referral network	How many bookings originated from word of mouth vs partner vs web.
Occasion map	What percentage of bookings are celebration-related. Trend.
Credit utilisation	Outstanding Mystic Morning credits. Expiry tracking.

Dashboard 5 — Experience Analytics

Field / Element	Specification
Purpose	Which experiences are performing? Which need attention?
Revenue by experience	Bar/pie breakdown of total revenue contribution per experience.
Golden Mirror vs Mystic	Ratio of sunrise experience modes. Seasonal view.
Celebration package uptake	Tracking all six celebration types over time.
Average group size	By experience. Identifies undersold capacity.
Feedback scores	Average rating by experience. Any below 4.0 flagged.
Cancellation rate	By experience and by season. Weather cancellations tracked separately.

Dashboard 6 — Conservation & Stewardship Tracker

Field / Element	Specification
Purpose	Record of SHER's environmental contribution. Ready for National Trust, grant applications, and investor reporting.
Conservation fund total	Running cumulative total in EC\$ and USD. By month and year.
Contributions by source	Mystic Morning transitions vs voluntary add-ons vs corporate donations.
Guests contributing	Number of individual guests whose name appears on a contribution.
Disbursements	Amounts transferred to PSEPA Stewardship Fund. Dates. Acknowledgements received.
Wildlife log highlights	Notable observations from the Weather Log over time.
Annual stewardship report	Auto-generates a summary suitable for National Trust or grant submission.

7. Annual Season Calendar & Market Framework

The SHER operating year is structured around four seasons, each with a distinct market focus, experience emphasis, and pricing posture. The Availability Calendar in the master database uses this framework to tag every date automatically. The Season Planner dashboard reflects it visually.

Season 1 — Peak (December 15 – April 30)

Field / Element	Specification
Market	International tourists. Winter escape from North America, Europe, UK. Premium resort guests.
Experience priority	Golden Mirror, all Celebration Packages, Scorpio's Secret. Full portfolio active.
Pricing	Full public pricing. No discounts. Celebration packages in high demand.
Partner activity	Maximum resort concierge engagement. Familiarisation tours for new partners in December.
Operational notes	Guide team at full complement. Celebration kit fully stocked. All experiences available 7 days/week.
TMS focus	Availability fills fast. Conflict check automation critical. Resort partner referral tracking active.

Season 2 — Shoulder (May, October, November)

Field / Element	Specification
Market	Transition. Mix of late/early international travellers and Caribbean regional visitors.
Experience priority	All experiences. Mystic Morning messaging begins in October. Celebration packages continue.
Pricing	Full pricing maintained. Shoulder is not a discount season.
Partner activity	Consolidation. Review partner performance. Onboard new concierges for next peak season.
Operational notes	Operational rhythm slightly reduced. Good season for guide training and certification.
TMS focus	Booking pipeline reviewed. Off-season local market activation planning begins in October.

Season 3 — Mystic Season (June – September)

Field / Element	Specification
Market	Fewer international tourists. Caribbean regional and diaspora travel. Eco-conscious independent travellers.
Experience priority	Mystic Morning as the featured dawn experience. Calm Reflections positioned as weather-resilient. Celebration packages for regional market (Barbados, Trinidad, regional diaspora visiting home).
Pricing	Full pricing maintained for all experiences. No weather-related discounting.
Local Saint Lucian market	Local nationals offered a Resident Rate: 30% reduction on Bay Serenity experiences. Full pricing maintained on islet and celebration packages.
Operational notes	Weather log especially important. Conservation contributions highest in this season. Guide team fully briefed on Mystic Morning delivery standards.
Conservation season	Most active period for the PSEPA stewardship contribution. Annual stewardship report submitted in October.
TMS focus	Weather log completeness is critical. Mystic Morning automation fully active. Conservation fund tracker closely monitored.

Season 4 — Local Saint Lucian Market

The local market is not a separate season — it runs throughout the year but intensifies during the Mystic Season. SHER is not a tourist attraction for locals. It is a sanctuary that belongs to the same island they live on. The local offering is designed around occasions and community, not tourism.

Offering	Target	Notes
Resident Rate Bay Serenity	Saint Lucian nationals year-round	30% reduction on \$180/\$150 public price. Requires Saint Lucian ID at booking.
School Conservation Programme	Primary and secondary schools June–September	Group rate. Environmental education focus. PSEPA partner activity. Linked to National Trust curriculum support.
Local Celebration Packages	Saint Lucian couples: proposals, anniversaries, vow renewals	Full celebration pricing. The islet does not become cheaper for any occasion.
Community Stewardship Day	Local community, conservation volunteers (quarterly)	Complimentary experience in exchange for bay stewardship activity. Organised with National Trust.

Offering	Target	Notes
Carnival Season Experience	Diaspora returnees, regional visitors (July)	Timed to Saint Lucia Carnival. Positioned as a counterpoint to the noise and celebration: “The bay is still here.”
Independence Day Package	Saint Lucians (22 February)	Special edition Mystic Morning or Golden Mirror with national colours in the refreshment presentation. Limited bookings.

8. Build Sequence — Three Phases

The TMS is built in three phases over approximately eight weeks. Phase 1 is the operational minimum needed to run the business properly. Phase 2 adds automation and intelligence. Phase 3 adds the seasonal and local market tools. Do not start Phase 2 until Phase 1 is tested and trusted.

Phase 1 — Operational Core (Weeks 1–3)

GOAL By end of Phase 1: every enquiry is captured, every booking is recorded in one place, availability is tracked daily, and waivers are collected and stored. The business runs on the system.

Task	Output
Create master Google Sheets workbook with 11 tabs	SHER TMS MASTER DATABASE.xlsx in Drive
Build Forms 1, 3, 4, 6	Enquiry, Waiver, Booking Confirm, Morning Log
Populate Experience Catalogue (Sheet 5)	All 11 experiences with pricing and rules
Populate Availability Calendar (Sheet 4) for full year	Every day tagged by season. All existing bookings entered.
Link enquiry form to website	Form embedded or linked on safehavenecotours.com booking pages
Build Automation 8 (Availability Check)	No double-booking or islet conflicts possible from this point
Set up Drive folder structure	All 7 folders created. Team access configured.

Phase 2 — Automation & Intelligence (Weeks 4–6)

GOAL By end of Phase 2: the system is running autonomously for routine communications. Dashboards are live. The team is no longer writing manual confirmation emails.

Task	Output
Build Automations 1, 2, 4 (enquiry reply, confirmation, 48h reminder)	Core guest communication running automatically
Build Automation 3 (Mystic Morning trigger)	Conservation contribution and credit auto-created on every Mystic Morning
Build Automations 5, 6, 7 (guide brief, feedback request, weekly report)	Full operational automation complete

Task	Output
Build Forms 2 and 5	Date flexibility waitlist and post-tour feedback live
Build Dashboards 1 and 2 in Looker Studio	Command Centre and Booking Pipeline live
Build Dashboard 3 (Season Planner)	Annual revenue view and capacity tracker live
Partner Register (Sheet 6) populated	All active partners entered. Commission tracking active.

Phase 3 — Intelligence & Market Depth (Weeks 7–8)

GOAL By end of Phase 3: all six dashboards are live, the local market framework is active, and the system is fully operational for a complete year of management.

Task	Output
Build Dashboards 4, 5, 6	Guest Intelligence, Experience Analytics, Conservation Tracker
Activate local market offerings in Experience Catalogue	Resident Rate and School Programme entries live
Build seasonal automation flags	June–October season language triggers in confirmation and reminder emails
Conservation Fund dashboard connected to National Trust template	Annual stewardship report auto-generates from Sheet 9
Full team walkthrough and testing	Every form tested. Every automation tested. Every dashboard verified.
Investor-ready dashboard share links configured	View-only Looker Studio links for investor/bank reporting ready

9. Implementation Notes

The TMS is built entirely within the Google Workspace free tier (Sheets, Forms, Drive, Looker Studio, Apps Script, Calendar, Gmail). There is no subscription cost beyond the Google Workspace Business Starter plan the business likely already uses. Total build time across all three phases is approximately 40–60 hours of setup work, largely completable by Claude Code or a technically capable person following this specification.

The system is designed to be maintained by the SHER team without ongoing technical support. The only items requiring technical intervention are changes to Apps Script automations if messaging or pricing logic changes — all other updates (new bookings, new partners, new prices) are data entry into the Sheets workbook.

NEXT STEP Provide this specification document to Claude Code with the instruction: “Build the SHER TMS Phase 1 according to the Architecture Specification. Create all 11 master sheets in a single Google Sheets workbook, build Forms 1, 3, 4, and 6 linked to the relevant sheets, populate the Experience Catalogue from the SHER Investment Brief v4, and set up the Drive folder structure.”

SHER Eco Sanctuary Tour Management System — Architecture Specification v1, May 2026. Prepared for Google Workspace implementation. All sheet names, form fields, and automation specifications in this document are design instructions, not live data. The system becomes live when Phase 1 build is completed and tested.
